

part-A:

1. Explain "Reading is the activity of reconstructing."

→ Reading is considered the activity of reconstructing because it involves the reader interpreting and rebuilding the meaning of the text based on their background knowledge, experience, and understanding. It is an active process where meaning is not just received but considered by the reader.

2. What is time management.

Time management is the process of planning and organizing how much time is spent on various activities. Effective time management allows individuals to complete more in less time, reduce stress, and increase productivity and efficiency.

3. Differentiate b/w panel interview and group interview.

Panel interview: Conducted by a panel of multiple interviewers questioning a single candidate.

Group interview: involves multiple candidate being assessed simultaneously, often including group activities or discussion.

4. What is critical reading?

→ critical reading is an analytical approach to understanding a text. It involves evaluating, interpreting, and questioning the material rather than simply accepting it at face value.

5. Differentiate b/w informative and interpretative reports.

→ Informative Reports presents facts without analysis or recommendation.

Interpretative reports provide analysis, interpretation, and may include recommendation based on facts.

Section-B

1. Differentiate b/w extensive Reading and intensive Reading.

Extensive Reading:- it involves reading long texts such as novels, newspaper, or article for general understanding and enjoyment. it helps improve reading, fluency, vocabulary, and builds a habit of reading. the focus is on overall meaning rather than details.

Intensive Reading:- it is reading shorter texts like paragraph or passage with full attention to details. it focuses on understanding vocabulary, grammar, and deeper meaning, this type of reading is commonly used in academic context to develop analytical and comprehension skill.

2. What are the characteristics of a report ? explain in details.

= characteristics of a report include.

- clarity: clear and concise language.
- structure: Organised format with section like introduction, body and conclusion.
- objectivity: free from personal bias.
- factual content: Based on evidence and data.
- formal tone: professional language and presentation.
- purpose-driven: aims to inform, analyze or recommend.
- visual: include charts, tables, or graph if needed for clarity.

3. What is research paper? Comment on its various components.

= A Research paper is formal and structured academic documents that presents the result of an in-depth study or investigation on a specific topic. It is written to share original findings, provide analysis, and contribute to existing knowledge in a field.

The main components of a research paper include:

Title: A concise and clear statements reflecting the core subjects of a research.

Abstract: A brief summary (usually 150-250 words) that include the research problems, methodology, key finding, and conclusion. It helps readers quickly understand the essence of paper.

Introduction: This section introduces the topic, provide background information, define the problem or research question, and state the purpose and objective of study.

Literature Review: A summary and evaluation of existing research related to topic. It shows the current state of knowledge and identifies gaps that the current study aims to fill.

Methodology: Describes the method and procedure used for data collection and analysis. It includes the research design, tool, sampling technique, etc.

Result: Finding the Research

Discussion: Interpretation of result

Conclusion: Summary and Future Scope

Reference: List of sources used.

part-c

1. Read the passage and answer the questions.

1. What is Artificial intelligence (AI)?

= AI is the ability of machine to mimic human intelligence by performing tasks like problem-solving, decision making, and language processing.

2. How does AI helps in healthcare?

AI helps in by analyzing medical image, detecting disease early, suggesting personalized treatments, and supporting robotics; surgeons for improved precision.

3. Which sector uses AI for traffic management, and self-driving cars?

= The transportation sector.

4. What is machine learning, and how does it relate to AI?

= machine learning is a subset of AI that enables system to learn and improve from data patterns, without being explicitly programmed.

5. Explain one benefits and one challenge of AI in the financial sectors.

Benefits: Enhances fraud detection and risk assessment.

Challenges: Ethical concerns like biases in decision-making.

6. How can AI improve education.

= By enabling personalized learning through adaptive platforms that cater to individual student needs.

7. Why is ethical consideration important in AI development?

- it ensure responsible use, prevent job displacement, bias, privacy issue, and promote fairness and accountability in AI system.

2. You have attended Rhythm 2025. Write a report on events that took place every day.

- The Rhythm 2025 was a 3 day event that took place from 27 - 29 March 2025. The event was a spectacular showcase of music, dance, and art, featuring a diverse range of performances and activities.

Day 1 (March 27, 2025)

The event kicked off with a grand opening ceremony, featuring a traditional dance performance by a local troupe.

The first day's lineup include

- A soulful music performance by an indie rock band.
- The contemporary dance recital by a group of young choreographers.

Day 2 (March 28, 2025)

The second day began with a mesmerizing yoga and meditation session, led by a renowned instructor.

The day's performance include

- A scintillating jazz concert by an international quartet.
- A stunning display of aerial acrobatics by a troupe of performers.

Day 3 (march 29, 2025)

The final day of the Festival started with a vibrant street performance by a group of buskers. The performance was followed by a closing ceremony.

Other highlights of the day include:

- A Fashion Show featuring sustainable clothing design.
- A workshop on music therapy and its application.

8. What do you understand by an interview? Explain in details.

= An interview is a formal conversation b/w 2 or more people, typically b/w an interviewer and an interviewee, with the primary purpose of:

- Gathering information
- Assessing suitability or qualification
- Making a decision
- Building relationship.

Types of interview:

- Structured interview** - A standardized set of question is asked to all candidates.
- Unstructured interview** - Questions are tailored based on candidate's response.
- Semi-structured interview** - A mix of structured and unstructured questions.
- Panel interview** - Multiple interviewers e.g. evaluate a single candidate.

Subject : _____

Date : ____/____/____

v. personal interview A Face to Face conversation b/w a recruiter and a candidate.

vi Stress interview: Candidates are presented with challenging, stress-filled scenarios.

vii Case interviews: Candidates are given a hypothetical situation or problem to solve.
